The Yellowstone County DUI Task Force is a group of diverse individuals comprised of concerned citizens, law enforcement, prosecutors, educators, prevention specialists, counselors, and area business representatives appointed by the County Commissioners with the mission of promoting a healthier and safer environment for county residents by attempting to reduce the number of alcohol related incidents through public education, awareness, legislation, and enforcement strategies.

Mission:
To reduce the prevalence of drinking and driving in Yellowstone County.

2017 Vision:
Expand current programs and continue to foster relationships with other community organizations.

Evaluation:
Outcomes to the strategies described in this plan will be reported on at meetings and monitored quarterly. The Yellowstone County DUI Task Force presents its program evaluation/report to the county commission each year.

Budget:
The Yellowstone County DUI Task Force receives funds from 50% of driver license reinstatement fees collected in Yellowstone County pursuant to Section 61-1-107 and 108, Montana Code Annotated. The funds are generated by individuals convicted of DUI and other traffic violations who pay a $200 reinstatement fee to the State to get their license back. One half are deposited in the State’s General Fund and the other half is disbursed on a quarterly basis to task forces throughout the State. The proposed budget for fiscal year 2017 as presented to the County Commission is included in this plan.
Problem: National Concerns Regarding Drinking and Driving

Impaired driving puts drivers, passengers, and pedestrians at risk, and each year it claims the lives of thousands of Americans. According to the most national statistic from 2012, more than 10,000 people died in alcohol-impaired driving crashes—1 every 51 minutes.

DUIs cost us $642 million every year in lost work productivity, alcohol treatment costs, medical costs, and other public and private spending. $49.1 million of that is spent on extra police, judges, and prison cells needed to protect citizens and enforce that the laws that are broken. Montana has one of the highest rates in the nation per capita for DUI consumption. Of those involved in fatal crashes, the average BAC was more than two times the legal limit. Felony offenders, those who have been convicted of at least three prior DUIs, estimate that they have driven, on average, 369 times per DUI conviction.

In the last few years, the fight against DUI gained momentum—changed the culture to the point where more people in our community recognize DUI is not something to dismiss. Montanans recognize DUI for what it is—illegal, dangerous behavior that puts our community at risk. Positive momentum translated into a great legislative session in 2015. The Yellowstone County Attorney Office lobbied in the State legislature to shore up DUI laws, close loopholes, and increase penalties. As a result, the legislature made driving under the influence with a child in the car a felony, doubled potential fines, and increased the minimum jail confinement on a felony DUI from 13 months to 2 years. 2015 saw the lowest DUI conviction rate in 15 years—5,101 convictions (compare to 10,000 convictions in 2010). While our efforts have been effective, the fight is not done.
DUI Related Offense Statistics for Yellowstone County

Yellowstone County is the most populous county in Montana, with approximately 155,634 residents. It is estimated that 23% of the population is 18 or under and 15% are over 65. The county is comprised of 2,649 square miles. As of 2015, Yellowstone County issued 253 liquor licenses.

Given its status as the most populous county in Montana, it is not surprising that Yellowstone County DUI is statistically relevant when it comes to DU:

- Percent of Crashes by County that were Impaired Driver Involved in 2015:
  
  Yellowstone County: 16.6%
  Missoula County: 11.1%
  Gallatin County: 8.5%

EVALUATION

The purpose of evaluation is to: 1) measure progress towards goals; 2) ascertain whether a process or program is working, and to adjust activities accordingly. Evaluation results can also be used to promote the work of the task force in the community. Location specific projects will offer both positive and negative feedback to adopt and modify better policies before implementation on a countywide basis or further distribution across the state.

The Yellowstone County DUI Task Force will evaluate three levels of outcomes: process outcomes, intermediate outcomes, and long term outcomes.

PROCESS OUTCOMES

- DUI Task Force Coordinator will keep records of attendance at meetings and business conducted at task force meetings through minutes.
- Task Force will track process outcomes for activities such as:
  - # and demographics of people participating or impacted
  - # of ads run
  - Frequency of activities
  - Equipment purchased
  - Training facilitated
  - Funding leveraged
- Grantees will report process outcomes to the task force.

INTERMEDIATE OUTCOMES

Availability of alcohol, marijuana, and prescription drug decreases.

The Yellowstone County Multi-Jurisdictional Alcohol Enforcement Team (MJAET) will provide DUI Task Force with reports on youth perception of availability as measured through the Montana Prevention Needs Assessment (MPNA).

The following factors related to availability will be tracked: prices of alcohol, marijuana, and prescription drugs; prevalence of medical marijuana caregivers, patients, and businesses; compliance check failure rates; social host violations; and prescription drug take back volume.

Community acceptance of problem drinking, marijuana use, and prescription drug abuse decreases.

Yellowstone County MJAET will provide the DUI Task Force with youth perception on community acceptance of problem drinking, marijuana use, and prescription drug abuse based on MPNA data.

Underage drinking and drug use decreased to levels that are on par with national average.

Yellowstone County MJAET will provide the DUI Task Force annually with a report on underage drinking and drug use in the country, including progress toward the risk factors identified here,
such as availability and social acceptance, lack of parental monitoring, and lack of early warning system.

Grantees will report intermediate outcomes to Task Force.

**LONG TERM OUTCOMES**

Long term outcomes will be measured using Montana Department of Transportation reports and location specific data on any pilot projects implemented and monitored by members or representatives of the Task Force. Progress towards long term outcomes will be examined annually.

- By 2018 number of alcohol and drug related crashes in Yellowstone County are decreased from 357 (2014) to 200.
- By 2018 the percent of alcohol and drug related crash fatalities decreased from 9.93%3 to 7%.

**Submission of Strategic Plan:**

The Yellowstone County DUI Task Force submits this Strategic Plan in accordance with statute and as requested by the Montana Department of Transportation. Attached to this plan is a spreadsheet that contains the proposed budget for 2017-2018 year.

Yellowstone County DUI Task Force in the Media

2017 St. Patrick's Day Parade - Billings, MT
The DUI Task Force presented at the Montana High School BPA (Business Professionals of America) State Convention this week. Officer Brandon Ihde from the Billings Police Department and Officer Fred Gregory from the Laurel Police Department presented on traffic safety and substance abuse. County Attorney Morgan Shaw also presented on the criminal side of underage drinking and driving and state laws.

Officer Gregory from the Laurel Police Department recently demonstrated for the BPA students that the drunk goggles are fairly realistic in how intoxicated individuals fail the Standard Field Sobriety Tests.
DUI related deaths and arrests are down for the first time in 15-years.

Officer Ihde (aka Trooper the Barrelman) did a great job representing Law Enforcement and the DUI Task Force at the NILE Rodeo. Notice our logo on his barrel! Great video and a great reminder to NEVER Drink and Drive!!
