

Summary of parcel accuracy enhancement project for Yellowstone County  
January 30<sup>th</sup>, 2009

**GCDB Adjustment**

Yellowstone County applied for and received a grant from the Montana Land Information Advisory Council (MLIAC) in Spring 2008. The grant is to adjust the GCDB in 26 additional townships (see map document). A contract with Premier Data Services was signed by the commissioners on September 26<sup>th</sup>, 2008. The corner selection phase for this grant project is complete. Morrison-Maierle personnel, the subcontractors, are currently collecting corner locations. The contract is scheduled to be completed by the end of February 2009. However the project is somewhat behind schedule due to poor weather conditions in December and January.

**Red-line township adjustments**

Premier Data adjusted the parcels in five townships that cover the City of Billings/Lockwood area during the first GCDB adjustment project. Currently, we have completed review and updating with new subdivisions in three of the five townships (1S25E, 1S26E, and 1N27E). We hope to finish the other two townships (1N25E, 1N26E) at approximately the same time as the current corner collection phase is complete. At that time, we will adjust the parcels to the new GCDB in all 51 townships at the same time.

**General comments**

I have more detailed reports from this project if anyone would like to read them, let me know.

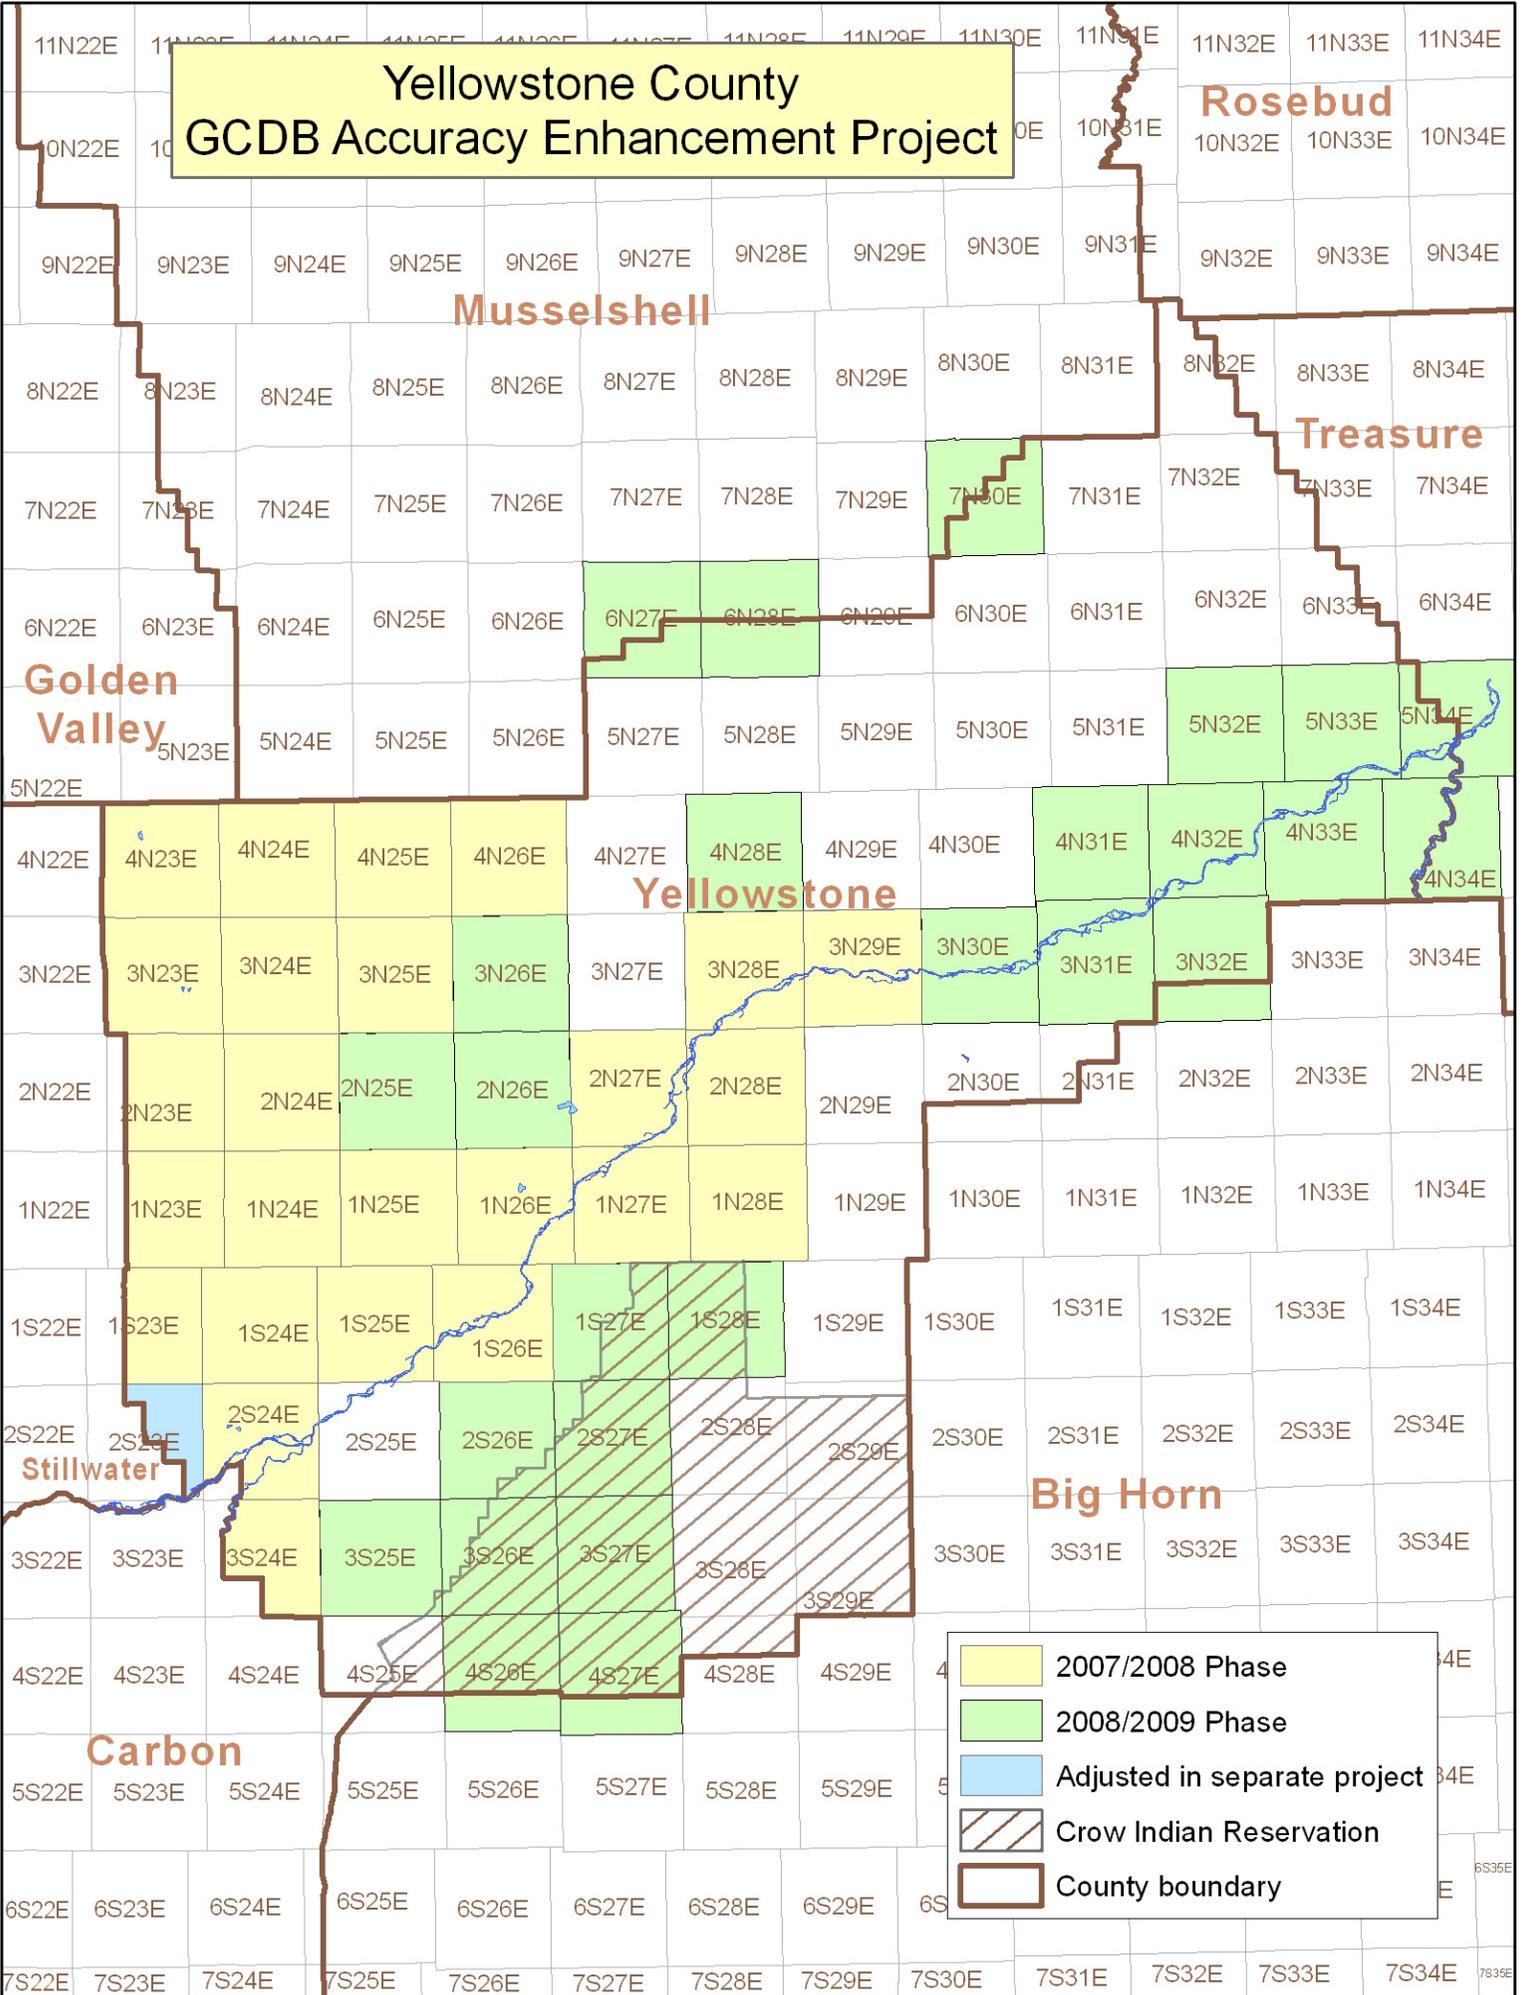

FYI, the Department of Revenue recently transferred to a new software system. As a result, data from CAMA has not been updated since January 2008. We have been unable to get a definite date for when they will be able to provide updated data. The ownership information was updated September 30, 2008 in preparation for tax billing. In the past we received daily updates for ownership. Again, due to the software change, we no longer receive these updates on a regular basis.
